DRY ICE
Cleaning Machine

Micro Jet

Micro Jet

Micro Jet 3000B is used in industrial cleaning by breaking down block dry ice and turning it into snow by spraying method. It makes it a new generation solution with its high performance of sensitive cleaning surfaces.

Micro Jet, whose body is made of stainless steel, is the outstanding product of its class with its compact design. 3000B, which breaks down block dry ice into snow, provides high performance for sensitive cleaning surfaces. We have a wide range of nozzle options for difficult to access surfaces.

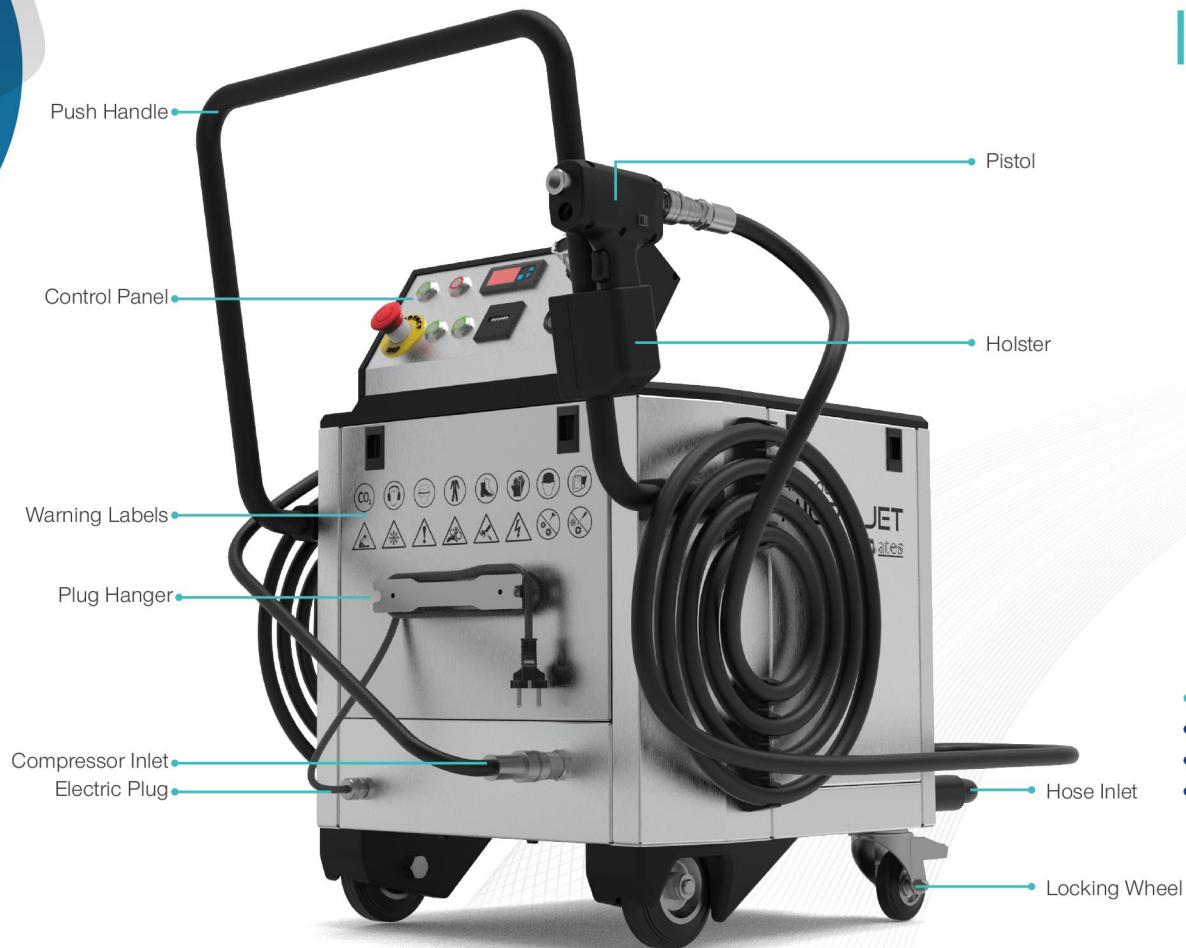

Precision Cleaning

The 3000B product, which stands out with its compact design, is used for sensitive cleaning with its snowing feature. Designed in accordance with European Standards (CE), this cleaning machine extends the life of your machine by cleaning it without having to stop your production. You will save time and money with dry ice cleaning.

This non-corrosive, non-scratching method is non-conductive and does not require secondary cleaning. The FDA-approved dry ice spraying method does not contain microbes on the applied surface and does not harm nature since it does not contain chemicals.

- Suitable in Food and Healthcare Industry
- Stainless Steel Body
- Compact Design
- Ergonomic Design
- Gentle Cleaning with Block Dry Ice
- Special Gun Hose
- Illuminated/Unilluminated Special Gun
- Working Capacity up to 10 bar
- Control Panel
- Emergency Stop Button
- Special Hose Cover
- 6+2 Types Nozzle Set
