DRY ICE
Cleaning Machine

Jet Stream

Jet Stream

Dry ice blasting is the leading method used in industrial cleaning. Jet Stream dry ice cleaning machine was designed by our developing technology and expert staff. It provides a reliable solution to cleaning with its advanced design adapted for demanding and sensitive applications.

It is used in many areas, especially food, health, space, production, energy, defense industry and various production sectors. It does not cause abrasion or scratching and is not conductive. It also does not require secondary cleaning. FDA approved dry ice spraying method is environmentally friendly. It does not contain germs and chemicals on the applied surface.

Easy Solution to Difficult Dirt

Standing out with its power and performance, Jet Stream features a stainless steel frame, durability and reliable design. It is designed in accordance with European Standards (CE) and extends the life of your dry ice cleaning machine with spraying technology without stopping your production. It saves time and cost.

You can easily control the spray parameters for the areas to be applied. It has various nozzles for comfortable use in different areas and surfaces. Its versatility provides a universal dry ice blasting experience for many industrial applications.

- High Hopper Capacity
- Adjustable Pellet Dosage
- Wide Nozzle Options
- Special Gun Hose
- Illuminated/Unilluminated Special Gun
- Working Capacity up to 10 bar
- High Maneuverability Wheel
- Lockable Front Wheel
- Easy-to-Open Locking Hinge System
- Control Panel
- Emergency Stop Button
- Special Hose Cover

AT- 41 Jet Stream

Dry Ice Cleaning Machine

Dimension (WxHxD) 500 x 960 x 935 mm
Weight 110 kg

Dry Ice Capacity 20 kg
Dry Ice Consumption 0 - 3 kg/min

Air Consumption 0.5 - 3 m³/min
Pressure 4 - 10 bar
